EXPERIENCE

Project Manager/Team Leader/Fullstack Developer

Paragraf Lex

📅 09/2023 - 📍 Belgrade, Serbia

- Led a team of 4 developers, managing task distribution and deadlines.
- Optimized project performance to minimize downtime and enhance reliability.
- Focused on delivering an excellent user experience and intuitive design.
- Projected timelines and managed project milestones effectively.
- Conducted code reviews and provided mentorship to intern developers.
- Streamlined development workflows and implemented best practices.
- Conducted client briefings to provide updates and gather requirements.
- Balanced managerial duties with hands-on coding to support the team.
- Collaborated with the Marketing department to develop a newsletter service, creating email templates, and ensure successful email delivery to users' inboxes.
- Worked with the Finance department to generate industry-specific invoices and create an automated payment system for the generated invoices.

Full Stack Developer Intern

Paragraf Lex

📅 07/2023 - 09/2023 📍 Belgrade, Serbia

- Implementation of closed login system, two factor authentication(Google Authenticator).
- Database, table and migration design for future use.
- Login landing page using Vue.js.
- Newsletter and email services using Laravel framework.
- User registration with email verification.
- Export of data and log generation based on users activity.
- Generation of SQL queries for correct inputs of users.
- Customize access permissions for each role, ensuring that sensitive operations and data are protected, and implement Vue.js components to reflect role-specific functionalities in the frontend.
- Design and implement a role-based access control system using Laravel's built-in features, allowing for different user roles such as admin, moderator, and regular user.

Junior Full Stack Developer

IT Development

📅 2018 - 11/2020 📍 Pancevo, Serbia

- Integrated internally-developed micro-services, as well as marketplace 3rd party modules into projects.
- Worked closely with the leading developer and five members of the team.
- Improved code maintainability for all 3 frontend projects.
- Increased the productivity of the team by coaching the other teammates, including the team leader, on full stack development by motivating them during team building exercises.
- Created Wordpress Theme from scratch using PHP based on artist's instructions.
- Developed mail service using Linux server and Roundcube Service Software.
- Using Google Analytics for tracking page views and hits.
- Developed search system based on users' request using jQuery.
- Integrated filtering system according to third party requests.
- Intensive use of ACF PRO for more than a year.

Steel Detailer

Steel Plan

📅 2014 - 2016 📍 Pancevo, Serbia

- Engaged in structural steel design development in the team of 8.
- Created 3D models and exported 2D drawings for SCA Salzburg Center.
- Collaborated with Civil Engineer to ensure customer safety.
- Team Leader in the Center For Promotion of Science project in Serbia.

Game Developer

Delani Studio

📅 2010 - 2014 📍 Pancevo, Serbia

- Designed and coded more than 10 Flash Games using Actionscript 3 OOP language.
- Converted Flash games to mobile apps.
- Collaborated with artists and sound designers to implement various features into projects.
- Negotiated the terms of publishing games with publishers.
- During this period I have completely understood basics of OOP coding style.
